REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art fails to teach or fairly suggest the claimed invention as a whole including valve means for controlling intake air flowing into the second passage of the intake port, the valve means guiding or being inclined so as to guide a flow of the intake air to the first passage of the intake port when the valve means prevents the intake air from flowing into the second passage of the intake port, in the context of an intake apparatus for an internal combustion engine, the internal combustion engine including a plurality of engine cylinders and an intake port connected to each of the cylinders, the intake apparatus comprising a partition extending in a longitudinal direction of the intake port so as to divide an inside region of the intake port into a first passage and a second passage, and a gas motion control valve including a rotatable valve element disposed upstream of the partition and spaced from an upstream end of the partition, the gas motion control having a full-closed position where the valve element prevents intake air from flowing into the second passage of the intake port and a full-open position where the valve element allows the intake air to flow into the second passage of the intake port, the valve element and the partition cooperating with each other to define an interspace between the valve element and the upstream end of the partition when the gas motion control valve is in the full-closed position.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
